Please note that the project artifacts submission (Cloud Strategy Document, Migration plan document and in-class presentation slide deck) is **due before class start** at 6 PM. **Please make sure to submit it on time.**

PROJECT INSTRUCTIONS:

At least two (2) artifacts are required for the project evaluation :

- Cloud Strategy Document

- Cloud Adoption and Migration Plan Document

You are welcome to submit extra documents like architecture diagrams, excel sheets for workload assessments, risk assessments, etc - although these are not mandatory.

The group will present the strategy and high-level adoption plan in the class.

The presentation deck should also be submitted here. The Presentation should not exceed seven (7) slides and should be delivered in 5-7 minutes. Exceeding the time or number of slides may result in losing marks since we have to accommodate all the groups to present before the end of the class
